To: Talk and Text Cell Phone Company@email.com

From: Michael Reed@email.com

Subject: Complaint

Dear Talk and Text Representative,

I am writing to you to complain about my new cell phone and service plan. I bought a new cell phone from Talk and Text last month, but the phone is already broken. The instructions say that I can take pictures with it and store them on my phone, but when I take a picture, it is erased after a few minutes. I would like to return this phone and get a new one without a charge.

Also, my text messaging plan needs to be changed. I thought my plan was for unlimited texting, but I just received a bill for all of the texts I sent last month. I do not think that I should have to pay this bill because my service contract with Talk and Text says that I have unlimited texting.

Please respond to this email, or call me at 326-555-8125.

Sincerely,

Michael Reed

The Bermuda Triangle

The Bermuda Triangle is an area of water in the North Atlantic Ocean that stretches from the island of Bermuda to Florida to Puerto Rico. Since the 1940s, a large number of planes and boats have mysteriously disappeared in this area. In many cases, these planes and boats were traveling in good weather conditions without any known problems, when they suddenly disappeared and were never seen or heard from again.

Over the years many people have tried to explain the strange disappearances. Some say that there must have been sudden storms or bad weather. Others say that gases in the water might have caused boats to sink. Some people even say that aliens are responsible. Scientists have been unable to agree on why so many boats and planes have disappeared in this area. But, one thing is for sure—until an explanation is found, people will continue to wonder what mysterious things are happening in the Bermuda Triangle.

1. The Bermuda Triangle is an area of land (F)
2. Cars, boats, and planes have disappeared in the Bermuda Triangle (F)

The Microwave Oven

The microwave oven is a common appliance that is used in kitchens all around the world today. Many people are so used to using a microwave that they have forgotten about all of the advantages the microwave has given to cooks. Before the microwave was invented, people spent a lot more time in the kitchen! The microwave was invented by a scientist named Percy Spencer in 1945. Spencer was working on a machine called a magnetron that produced microwave radio signals for radar systems. One day, Spencer had a chocolate bar in his pocket that he was saving to eat for a snack later. While he was standing next to the magnetron, he noticed that the chocolate bar was melting in his pocket. He realized that the microwaves had melted it. He did more tests, using popcorn and eggs before he realized that he had just discovered a new, very useful way of cooking. The first microwave oven weighed about 700 pounds (318 kilograms) and was about five feet (152 centimeters) tall. It was about the size of a refrigerator! But, with time and more experiments, the microwave became much smaller and is now used in kitchens everywhere.

Spread the News

These days, people do not watch the news on television as much as they used to. They also don't read as many printed newspapers. Now it is easier to get the news on the Internet. It is quick and easy to read news online: You can choose which stories to read, and it is usually free! Another benefit of online news is that it is easy to share an interesting news story with your friends by emailing it to them.

Researchers at the University of Pennsylvania wondered what kinds of news stories people share most often. Do they share good news or bad news? Do they share gossip about celebrities or scientific research? Some people were surprised by the results of the study. The researchers found that people like to spread good news. They share stories that fill them with awe and inspiration, or good emotions. They also spread scientific and academic stories more often than gossip. Have you ever emailed a news story to a friend? What kind of news was it?

1. More and more people are getting the news on the Internet (T)
2. When people feel inspiration, they feel bad (F)
3. A benefit to getting news on the Internet is that you can share stories through email (T)
